Web Technology I Project Report

Project Name: Blog Website

Deployed URL: <https://prajwalbashyal.github.io/blog-website/>

Source Code: https://github.com/prajwal-1524/web_tech/blog-website

1. Project Objective

The objective of this project is to design, develop, and deploy a fully functional **blog-based website** using **HTML, CSS, and JavaScript**.

The website demonstrates clean UI, responsive design, readable layout structure, and basic client-side interactivity.

2. Requirements

The project required the following:

- At least **three interconnected web pages** (Home, About, Contact).
- Proper **navigation bar** on every page.
- Use of **HTML5 semantic elements**.
- Use of **CSS layout techniques** such as Flexbox.
- Use of **JavaScript** for minimal interactivity (form validation, menu toggle, etc.).
- A **Portfolio page** showing personal projects.
- Proper alignment, spacing, and responsiveness.
- Use of **external CSS and JS files**.
- Avoid inline styling and script embedding.
- Basic deployment on any free hosting platform or GitHub Pages.

3. Implementation Details

Pages and Navigation

- Developed **Home (Blog)**, **About**, **Portfolio**, and **Contact** pages.
- Created a **responsive navigation bar** with active page highlight.
- Ensured consistent navigation across all pages.

Design and Layout

- Used **Flexbox** and **media-queries** layouts for structured content.
- Used a simple **color theme** suitable for a blog website.
- Ensured all text is **properly aligned and readable**.
- Added **smooth hover effects**, card components, and a clean modern UI.
- Implemented **fully responsive design** for mobile, tablet, and desktop.

Source Code

- **4 HTML pages**
 - `index.html` (Blog Home)
 - `about.html`
 - `portfolio.html`
 - `contact.html`
- **1 CSS file** → `style.css`
- **1 JS file** → `script.js`

Deployment

- Website deployed using **GitHub Pages / Free Hosting**.
- Used a **free subdomain** if hosting provider supports.
- Linked all necessary files externally for smooth loading.

Website

Homepage

Homepage written as index.html is a responsive webpage that displays blog posts related to HTML, CSS, and JavaScript. The layout is clean with blog cards, a short introduction, and quick access to other sections of the site.

DESKTOP view:

mobile view: Post1:

About Page:

The **about.html** page gives a brief introduction about myself, including skills, interests, and background. It uses a simple two-column layout with text on one side and an image on the other for a clean and professional look.

Portfolio Page

The **portfolio.html** page showcases my projects in a simple grid structure. Each project card contains a screenshot and a short description, making it easy for viewers to see my work at a glance.

Contact Page

The **contact.html** page contains a responsive contact form where users can fill in their name, email, subject, and message. The form is placed inside a neat card layout, giving the page a simple and organized appearance.

Desktop view”

The screenshot shows a web browser window displaying the 'Prajwal Blog' contact page. The browser's address bar shows the file path: /home/prajwal/Desktop/Lab_reports/fourth_sem/WEBTECH-I/blog_website/contact.html. The page has a blue header with the title 'Prajwal Blog' and navigation links for 'Home', 'About', and 'Contact' (the 'Contact' link is highlighted in yellow). Below the header, the 'Contact' section is enclosed in a white card. It features three input fields: 'Name' (containing 'Prajwal Bashyal'), 'Email' (containing 'bashyalprajwal@gmail.com'), and 'Message' (containing 'hey its me prajwal bashyal'). Each field is preceded by its label and a red asterisk indicating it is required. A blue 'Send' button is positioned at the bottom left of the card.

File structure:

Conclusion

This project successfully meets the requirements of Web Technology I. The website is clean, responsive, and user-friendly. It demonstrates proper use of HTML, CSS, and JavaScript while presenting a simple blog, personal information, portfolio, and contact form.
