Summary and Conclusion	13

1. Acknowledgement

- We extend our sincere gratitude to:
 - Bhaktapur Multiple Campus & administration team.
 - Our supervisor Sunita Maharjan mam.
-
- Presented by:
 - Prajwal Bashyal
 - Samir Banjara
 - Saman Gajurel
 - Samip Pandey

2. Objectives of Study

- To automate recording & managing student marks
- To minimize manual errors & to provide real-time progress tracking

3. Feasibility

Study:

Initial Investment: Rs. 100,000

Year	Project A Income
0	-100000
1	10000
2	10000
3	10000
4	20000
5	100000

Results:

- Net Present Value (NPV): +8,529.85
- Net Profit: Positive (50,000)
- Payback Period: Within 5 years
- ROI: Strong return on investment with ROI 50%.

Feasibility Conclusion:

Based on the financial analysis and project evaluation, the Student Marks Management System is feasible:

- Financial Feasibility: Profitable with positive NPV and ROI
- Operational Feasibility: Improves efficiency, accuracy, and usability

- Technical Feasibility:

The system uses widely available and scalable technologies: Python (Django), HTML/CSS/JavaScript, and MySQL.

- Legal Feasibility:

The system complies with data privacy laws to secure student information. Proper software licensing ensures no legal conflicts

→ The project is recommended for implementation.

4. Market Opportunities & Significance

- Accelerated(booming) Digital Transformation
- Booming market growth:
- Demand for integrated Platforms
- Data-driven decision making

5. Significances

- Saves time
- reduces errors
- Improves efficiency of institutions
- Provides performance insights
- Fair decision making
- Scalable with future features

6. Challenges & Limitations

- Resistance to change in digitalization
- Internet Dependency
- Data security & privacy concerns
- Training & support required
- Internet connectivity issues

7. Block Diagram

Entity-Relational Diagram

Pseudo code

START

Initialize Student List

Menu:

1. Add Student

- Input: ID, Name, Marks
- Add to Student List

2. Display Students

- Show all student details

3. Search Student

- Input: ID
- If found → Display details
- Else → "Not Found"

4. Calculate Average

- Sum all marks
- $\text{Average} = \text{Total} / \text{Number of Students}$
- Display Average

5. Exit

END

Summary

- Enhances accuracy & transparency
- Financially viable & scalable
- Reduces workload & improves efficiency
- Complies with legal requirements
- Strategic investment for education sector

Conclusion

- We believe this is the smarter choice for the institution in overall marks management and result preparation.

"We Value Your Questions"

Thank you
